Art Unit: 3709

Group II, species B, method of using the valve described in figures 12-14 II,
drawn to para. [0108]:

Group II, species C, method of using the valve described in figures 12-14 III,
drawn to para. [0109]:

The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Specifically, applicant is required to elect for prosecution at this time one of (apparatus) IA or IB or IC or ID or IE together with one of IIA or IIB together with one of IIIA or IIIB together with one of IVA or IVB together with one of VA or VB, and also one of (method) IA or IB or IC together with one of IIA or IIB or IIC.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 3709

the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).
